(306-631-7556)

*Holding senior roles in municipal government, community-based, private and not-for-profit organizations throughout my career, I have had the opportunity to develop strategic goals, annual budgets, marketing strategies, programs, volunteer administration and overall management approaches for success. Leading cohesive teams, volunteering, and building strong relationships/partnerships within the Moose Jaw community has been a learning experience, giving me a better understanding of the evident needs and requirements to create a positive, educated community. "Learning together for our future" becomes a public responsibility and with my knowledge and experience, I want to enhance forward critical thinking to ensure that our children receive the most innovative learning opportunities with decisions that reflect their best interest. Having a young family entering into the school system provides insight on taking a leadership role in ensuring that proper educational programming and services are being provided to those who live within the Moose Jaw and surrounding communities.*
