

Laura Connors - Candidate Statement

As a retired teacher with 31 years experience, I believe every child should have access to an education and be provided all the best tools available for that child's success. In the past three decades I have seen many changes in Saskatchewan's education system and feel that local school boards have a role to play in the operation and advocacy of their divisions. Although the funding principles of education are based on business models, the educating of students is not a business of a specific commodity. Education involves many diverse needs and strategies to see student success, children do not fit into a specific mold and having a division school board provides a local voice for our children's education.
