

## **Luda Tomas – Candidate Profile 2016**

I am a mother of a daughter who is in the Prairie South School Division. I believe the education system could be improved. I have an Engineering Degree and tutor students with mathematics. I can see that many of them are facing problems. I've seen students dropping out of high school because they are not able to handle their studies. I think that the problem is that in elementary school kids do not learn to work hard. Only in high school they start to get a sufficient amount of homework and it gets harder and harder every year. Often the kids can't handle the work and drop out. I believe that if we improve our school system we will have more better educated and intelligent people and we all will benefit from it. I am a receiver of the Governor General medal and I am constantly educating myself.
